Expansive Ceramics

INSTRUCTOR: Elaine Buss

The focus of this workshop will be to explore basic ceramic skills and simple ways to expand them into larger projects. Our week will start with wheel throwing. We will learn to alter forms through stacking, shaping, and combining. Our approach to hand-building will take the same attitude – how can a simple approach be built upon over several short class periods? We will decorate using underglaze techniques, including paper resist, monoprinting, and layering.
